Term Life Underwriting Guidelines

Individual Level Term — 10 / 15 / 20 / 30 Year · Illustrative specimen for system testing

Synthetic illustrative guidelines for testing rule extraction. Section numbers are stable so generated rules can cite them. Not a real underwriting manual; thresholds are invented.

1. Purpose & scope

1.1 These guidelines govern individual level term life insurance (10-, 15-, 20-, and 30-year). Issue ages 18–75. Face amounts $100,000 to $5,000,000.

1.2 Each application resolves to a risk class, a referral to a human underwriter, or a decline. Accelerated (no-exam) underwriting applies to qualifying applicants per Section 6.

2. Eligibility

2.1 Issue ages by term

Term	Minimum issue age	Maximum issue age
10-year	18	75
15-year	18	70
20-year	18	65
30-year	18	50

2.2 Face amount: minimum $100,000; maximum $5,000,000. No-exam limit is $1,000,000 through age 50 and $500,000 for ages 51–60.

2.3 Applicant must be a U.S. citizen or lawful permanent resident (green card). Other visa categories are referred (Section 4).

3. Automatic decline conditions (knockouts)

Decline the application if any of the following is true:

3.1 Applicant age is outside the issue-age band for the requested term (see 2.1).

3.2 Requested face amount is outside the limits in 2.2.

3.3 Current terminal illness, hospice care, or life expectancy under 24 months.

3.4 Active diagnosis or treatment of metastatic cancer.

3.5 Current use of supplemental oxygen for a chronic respiratory condition.

3.6 Organ or bone-marrow transplant recipient, or current transplant candidate.

3.7 Two or more DUI/DWI convictions within the past 5 years.

4. Referral conditions (refer to a human underwriter)

Do not auto-decide; refer if any of the following applies:

4.1 Any cancer history other than basal-cell or squamous-cell skin cancer.

4.2 Diabetes with onset before age 30, or any insulin-dependent diabetes.

4.3 Any cardiac event, coronary stent, or bypass at any time.

4.4 Non-citizen / non-permanent-resident applicant (see 2.3).

4.5 Hazardous avocation: aviation other than as a commercial passenger, scuba below 100 feet, motor racing, or mountaineering.

4.6 Any condition or medication not represented in the auto-decision tables in Section 5.

5. Risk classification

5.1 Risk classes, best to worst: Preferred Plus, Preferred, Standard Plus, Standard, Substandard (Table 1–8), Decline.

5.2 Tobacco / nicotine: any use within the past 12 months assigns a Tobacco class; the best attainable class is Preferred Tobacco. Cessation of 12–60 months follows the modifier table; no use for 60+ months is non-tobacco eligible.

5.3 Build (body mass index)

Best class allowed	BMI range
Preferred Plus	18.5 – 28.0
Preferred	up to 30.0
Standard Plus	up to 32.0
Standard	up to 37.0
Refer	37.1 – 40.0
Decline	above 40.0, or below 17.0

5.4 Blood pressure (treated or untreated, well controlled)

Best class allowed	Maximum reading
Preferred Plus	135 / 85
Preferred	140 / 90
Standard	150 / 95
Refer	above 150 / 95

5.5 Cholesterol: a total-to-HDL ratio of 5.0 or below takes no debit; a ratio above 7.0 is referred.

5.6 Family history: death of a parent or sibling from cardiovascular disease or cancer before age 60 bars Preferred Plus (Preferred is allowed).

5.7 Driving: one DUI/DWI in the past 5 years, or three or more moving violations in 3 years, assigns a minimum of Table 2 (see 3.7 for decline).

5.8 Avocation / aviation: refer per 4.5, or apply the applicable flat extra from the modifier table.

6. Evidence requirements by face amount (ages 50 and under)

Face amount band	Required evidence
Up to $1,000,000	Accelerated / no-exam eligible
$1,000,001 – $2,000,000	Paramedical exam + laboratory testing
Above $2,000,000	Exam + labs + attending physician statement + financials

7. Substandard ratings (illustrative)

7.1 Substandard premium = base Standard premium × (1 + 0.25 × table number). Flat extras are added per $1,000 of face per the modifier table.

Appendix A — Illustrative base annual rate per $1,000 (Preferred, non-tobacco)

For reconciliation-harness testing only. These are invented figures, not filed rates.

Issue age	10-year	20-year
30	0.78	0.94
40	1.02	1.55
50	2.40	3.95
